

Dear Parent/Guardian:

Your student is enrolled in the General Financial Literacy course required for Utah high school graduation. The standards for this course include:

- Financial Goals and Planning
- Income and Career Planning
- Money Management
- Saving, Investing, and Retirement

A key ingredient for a student's successful learning is parent/guardian involvement. Research shows that students learn a considerable amount of their financial knowledge and habits from their parents/guardians. Parental involvement with the assignments and activities in this course will increase student understanding and help them grow to be independent, self-supporting individuals who make responsible, informed decisions.

Protecting student/family privacy and identity is essential. Consistent with Utah Law, Section 53A-13-301, students will not be asked to provide any personal/family information or financial data.

However, to make the course concepts meaningful to the students, they may be asked to develop individual financial plans or budgets or to otherwise make personal application of financial principles. For example, with parent/guardian permission or assistance, a student may gather and analyze information about buying a car of his/her choice and set up an ongoing personal budget.

Please contact me with any questions you may have about this course.

I grant permission for my student, _____ (please print), to complete activities and assignments in the General Financial Literacy course using personal application of financial principles. I understand that my student will not be required to disclose any private or family financial data.
